

# SECURITY OPTIONS

**More steel equals more security.** By adding additional layers of steel you are increasing the tensile strength of the safe, making it stronger and more resistant to attacks. Fort Knox gives you multiple ways to construct your **hand made safe** to give you the peace of mind you deserve. Create your safe with a heavier steel body with a Safe Body Upgrade or increase the level of security with both the safe body and door with

the Deluxe Package. Add up to four additional layers of steel to the inside of your safe and you will have premier steel tensile strength and unsurpassed security. New for 2012 is Fort Knox ArmaKnox. Three times stronger than mild steel and able to give your safe a Level 3 ballistics rating, Fort Knox ArmaKnox is true superior strength. Whether you select a standard safe, or choose one of our legendary steel upgrades, Fort Knox is the security leader.

## DELUXE PACKAGE™

Increasing both the steel thickness in the body of the safe as well as the door creates a more secure safe. The Deluxe Package is one of our most popular options and creates an unmatched steel barrier. Increase the steel in your safe door and safe body up to a Level III Deluxe Package with Fort Knox.

## INNER STEEL LINER

For added security and maximum protection, Fort Knox offers an option for additional security levels to line the inner walls of your safe. Between Level I and Level IV security can be added to create additional barriers for any burglar trying to breach the inside of the safe. The industry leading security becomes unmatched with the Inner Steel Liner.

100% PENETRATION WELDS OUTSIDE PLUS REINFORCING WELDS INSIDE

3/16", 1/4" OR 10 GAUGE PLATE STEEL OUTER WALL

1/8" Dead Air Space

Thick Walls of UL Listed Type C Fire Board

10 Gauge Steel Inner Security Wall (Optional)

Upgrade With Multiple Inner Steel Liners (Up to 4 layers of protection)

Up to 2 1/32" Total Thickness

## SAFE BODY UPGRADES

Your safe is the last line of defense for your valuables. With your Fort Knox safe you can now increase the steel thickness of the safe body up to a category II or III rated steel body! For the most protection, make sure that your safe has the Fort Knox Body Upgrade.

## STAINLESS STEEL

The stainless steel package reinforces the body and door of the safe with a 10-gauge stainless steel barrier for optimum protection against a torch attack. Safe must have a reinforced steel liner and reinforced fire door. Standard on Legend Series.
